

ABSTRACT OF THE DISCLOSURE

A substantially circular disc of Totally Stable ® 2095 fabric which is made of a wet laid, water based processed, cut away, 3.0 ounce, non-woven backing, 85% acrylic latex polyester and 15% cellulose wood pulp is disclosed for insertion between laser discs outside of a laser disc drive. The disc prevents surface scratching of laser discs. The disc is placed between laser discs outside of a case and between laser discs in laser disc cases, spindle containers, storage files and carrying cases. ~~This invention further includes a laser disc enclosure for protecting both sides of a laser disc inside and outside of a laser disc drive.~~
